# I have a doubt regarding equation balancing covered in last lecture. Please help!!

Lorem Ipsum is simply dummy text of the printing and typesetting industry. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged.

## 2 Responses so far

As per my understanding, **equation balancing** is done using blah as opposed to using 'Content here, content here', making it look like readable English. Also, *balanced equations* can be derived using certain techniques. For more details, visit this website Hope this helps!

## Found this really simple explanation of "How covalent bonds work". Thought of sharing with the class :)

Lorem Ipsum is simply dummy text of the printing and typesetting industry. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. For more information, visit this website.

### 1 Response so far

This is an excellent and simple explanation of the concept. Kudos Anita for sharing this with a wider audience!!

## Details of the upcoming test on 2nd May

Class,

This is to inform that the upcoming test will be covering following topics:

- Organic Chemistry (Chapter 1 - 5)
- Inorganic Chemistry (Chapter 1 - 3, 7)
- Chapters 2 and 3 from official textbook.

**NOTE**: The chapters covered in last test will also be included.

All the best!

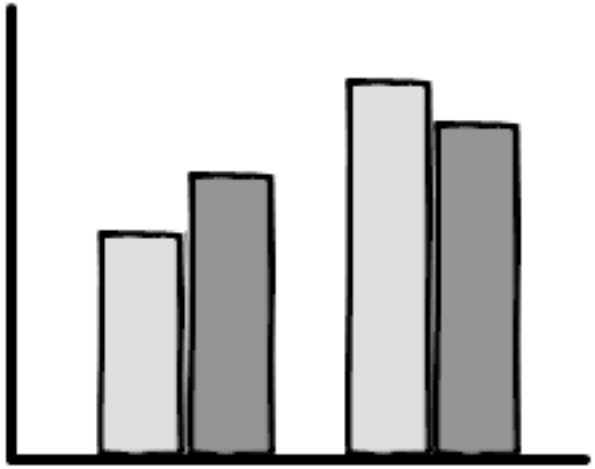
# Test has now been graded

Class,

The test has been graded and I have emailed your scores. You can visit me after class in my cabin to see your answer sheets and clear any doubts. I am happy to tell that the class performance has been really good. The average marks are pretty good and standard deviation is low too.



I hope this gives motivation to you all to do even better in the next test. Please feel free to create a new post on any common doubts during the test.

Welcome, Rohan
Physics VIII B
ACME School, Summer 2017
Overview
In this course, we will get an introduction to various topics of Introductory Physics including but not limited to:
Laws of Motion
Collision of Physical bodies
Thermodynamics
Planetary Laws
Angular velocity
Atomic Theories
